

BRUV PARTY

BRITAIN RESTORING UNDERLYING VALUES

A CALL TO RESTORE BRITAIN

January 6, 2025

A Time-Limited Mission of Accountability

This isn't about empty promises or lifelong careers in politics—it's about results. Everything I pledge comes with a strict time limit. If I don't deliver, I step down. No excuses, no hiding, no second chances.

Unlike the career politicians who cling to power while achieving nothing, I will hold myself accountable to the same standard I demand from others. If I fail, I face the consequences—because leadership is about service, not self-preservation.

This is a mission, not a reign. And it ends the moment it stops delivering for the British people.

We can save Britain quickly with immediate and decisive action.

Unapologetic. Relentless. For Britain.

Look around you. Look at what we've become. A nation that once ruled the waves, that stood as the beacon of strength and freedom, now cowers under its own shadow. Our streets are dangerous, our borders are wide open, and our culture? It's being eroded.

This isn't the Britain our ancestors fought for. This isn't the Britain they died for. And this cannot be the Britain we leave to our children.

They deserve what brave men died for. They deserve what you've struggled for.

We must end the generational failure.

Harsh Migration Control

Over 45,000 illegal migrants arrived on our shores last year— each one costing you, the British taxpayer, **£15,000 annually.** That's your hard-earned money funding people who have no respect for our borders, our laws, or our way of life.

The solution is clear: **not one more boat lands on British soil.** Boats will be leaving the UK filled with illegal migrants and not A SINGLE ONE will be arriving on our shores.

This is a campaign guarantee.

The Royal Navy will patrol our waters, and our message will be clear: **if you come here illegally, you will not set foot on this land.**

Our borders are sacred. Our sovereignty is not negotiable

BRITISH MEN DIED FOR BRITISH SOIL.

IT IS NOT YOURS AND YOU HAVE NO RIGHT TO IT.

IT IS NOT A LINE ON A MAP, IT IS AN ISLAND DEFENDED WITH THE LIVES OF THE BRAVE.

IF YOU GET ON A BOAT, WE WON'T LET YOU IN.

WE HAVE NO OBLIGATION TO SAVE YOU FROM THAT BOAT NO MATTER HOW ROUGH THE SEA.

YOU SHOULDN'T BE ON THE BOAT IN THE FIRST PLACE.

YOU HAVE NO RIGHTS TO OUR LAND.

ILLEGAL IMMIGRATION WILL FALL TO ZERO ENFORCED BY THE ROYAL NAVY.

DO NOT COME TO OUR ISLE.

DO NOT RISK IT.

WE DO NOT OFFER SALVATION.

PRIME MINISTER TATE.

Knife Crime Epidemic: Zero Tolerance, Maximum Deterrence

Last year, there were **50,000 knife crime offences in England and Wales**. That's 137 every single day. Mothers burying sons. Fathers burying daughters. Lives stolen. Futures destroyed. And what's the punishment? A slap on the wrist? A few years in jail?

No. **The punishment will be seen by every Briton, every day.**

Introducing BBC Punishment—a 24/7 live broadcast of knife crime offenders serving solitary confinement. No redemption arcs. No second chances. Just the cold, hard reality of a life wasted in a concrete cell.

Imagine a 15-year-old boy, tempted to pick up a blade, turning on the TV and seeing a man grow old and die alone. That's not cruelty—it's deterrence. And it will save lives.

Reforming the BBC: A Rotten Institution

The BBC was once a cornerstone of British culture. Today, it's a stain on our nation's name.

- **Sexual abuse scandals.**
- Allegations of **child exploitation.**
- Reports of **pornographic content.**

This is not just negligence—it's rot. And it must be purged.

The BBC will be stripped down and rebuilt:

- Its mission will be **factual reporting, not propaganda.**
- BBC will get its topics from X and have a community notes style online system for verification of all stories and debate with the public.

The BBC will have a public trust score based on its accurate reporting of events and voted on by the populace.

The BBC **MUST** reach a minimum trust level to be government funded.

The BBC must serve Britain—not undermine it.

Protecting Our Children and Restoring Traditional Values

The attack on our culture doesn't end with the BBC. It's happening in our schools, where the innocence of children is being sacrificed on the altar of ideology.

Did you know that **children as young as six are being exposed to graphic LGBTQ+ materials?** This is not education—it's indoctrination.

Let me be crystal clear:

- All LGBTQ+ propaganda will be **banned** from schools.
- Classrooms will no longer be battlegrounds for ideological warfare.

Instead, we will promote **traditional family values**—respect, responsibility, and the importance of strong family bonds.

This is not about hate—it's about protecting childhood.

Restoring British Culture and Identity

Britain's history is under attack. Our heroes are vilified, our traditions dismissed, and our streets no longer reflect the country we know and love.

It's time to restore pride in our heritage:

- Appoint a Minister for British Culture to celebrate and preserve our history.
- Cap non-British residents at **10% of the population** to maintain cultural balance.
- Replace modern "art" with statues and monuments honouring British heroes.
- Ensure every street in Britain feels British—with English signage, flags, and traditional architecture.

Any illegal migrant which is identified by a police officer will be arrested and deported from the nation within 7 days. No court case.

No compromise. Illegals will leave. You have no rights to British soil.

MEN DIED FOR OUR FLAG. IT SHOULD BE SEEN ON OUR STREETS.

Revolutionising Education: Building the Future Britain Deserves

Britain's future doesn't lie in outdated manufacturing—it lies in innovation, entrepreneurship, and technology. To create a nation of leaders and problem-solvers, we will:

- Overhaul the national curriculum to prioritise entrepreneurship, critical thinking, and financial literacy.
- Arm young Britons with the skills to launch businesses, pioneer technologies, and dominate the global stage.
- Teach our children not just to take jobs, but to create them.

A nation of innovators is a nation of power. Britain may not outpace the world in manufacturing, but it can lead as a global business and technology powerhouse.

This transformation starts in our schools. We'll teach every child the value of hard work, the tools to succeed, and the drive to build a future where they can provide for their families and thrive in a competitive world.

Investing Where It Matters

For decades, Britain has spent **£14 billion annually on foreign aid**, much of it going to countries that later send migrants to our shores—costing taxpayers even more. While we fund other nations, our own communities are being neglected.

- **Nearly one in five schools in England** is rated “inadequate” or “requires improvement”.
- Some areas face **infrastructure deficits**, with crumbling roads, underfunded public transport, and dilapidated community centres.
- Meanwhile, foreign aid recipients often misuse these funds, with little accountability or benefit to Britain.

NO MORE FOREIGN AID. NO MORE FOREIGN WARS.

- Foreign aid spending will be cut to zero. Every single pound will be reinvested into rebuilding Britain—modernizing schools, repairing facilities, and ensuring every child learns in an environment that inspires success.
- Billions will fund infrastructure projects to rejuvenate neglected towns and cities, giving communities the resources they need to thrive.

The British military will no longer be a tool for global conflicts. The Minister of Defence will have one mission: **defend our borders and our sovereignty**. The channel will be secured, our shores protected, and every ship, plane, and soldier will serve only the interests of the British people.

There is no justification for sending men, weapons, or resources to foreign wars when Britain is under siege at home. The military's focus will be singular: **the protection of our homeland**. Sovereignty starts here.

Prioritizing the NHS: Healthcare for Britons First

The NHS is in crisis. Waiting times are at an all-time high, with **7.6 million people waiting for treatment as of 2023**. Yet, billions are spent on treating individuals who have never contributed to the system.

This must change.

- **Priority One: British taxpayers**—the people who fund the NHS should come first.
- **Priority Two: British passport holders**—those who carry the privilege and responsibility of citizenship.
- **Priority Three: Everyone else**—emergency care only, with costs recovered wherever possible.

Did you know the NHS spends **£500 million annually on health tourism**, treating people who travel to the UK solely for free healthcare? This is unsustainable. The NHS exists to serve the British people, not the world.

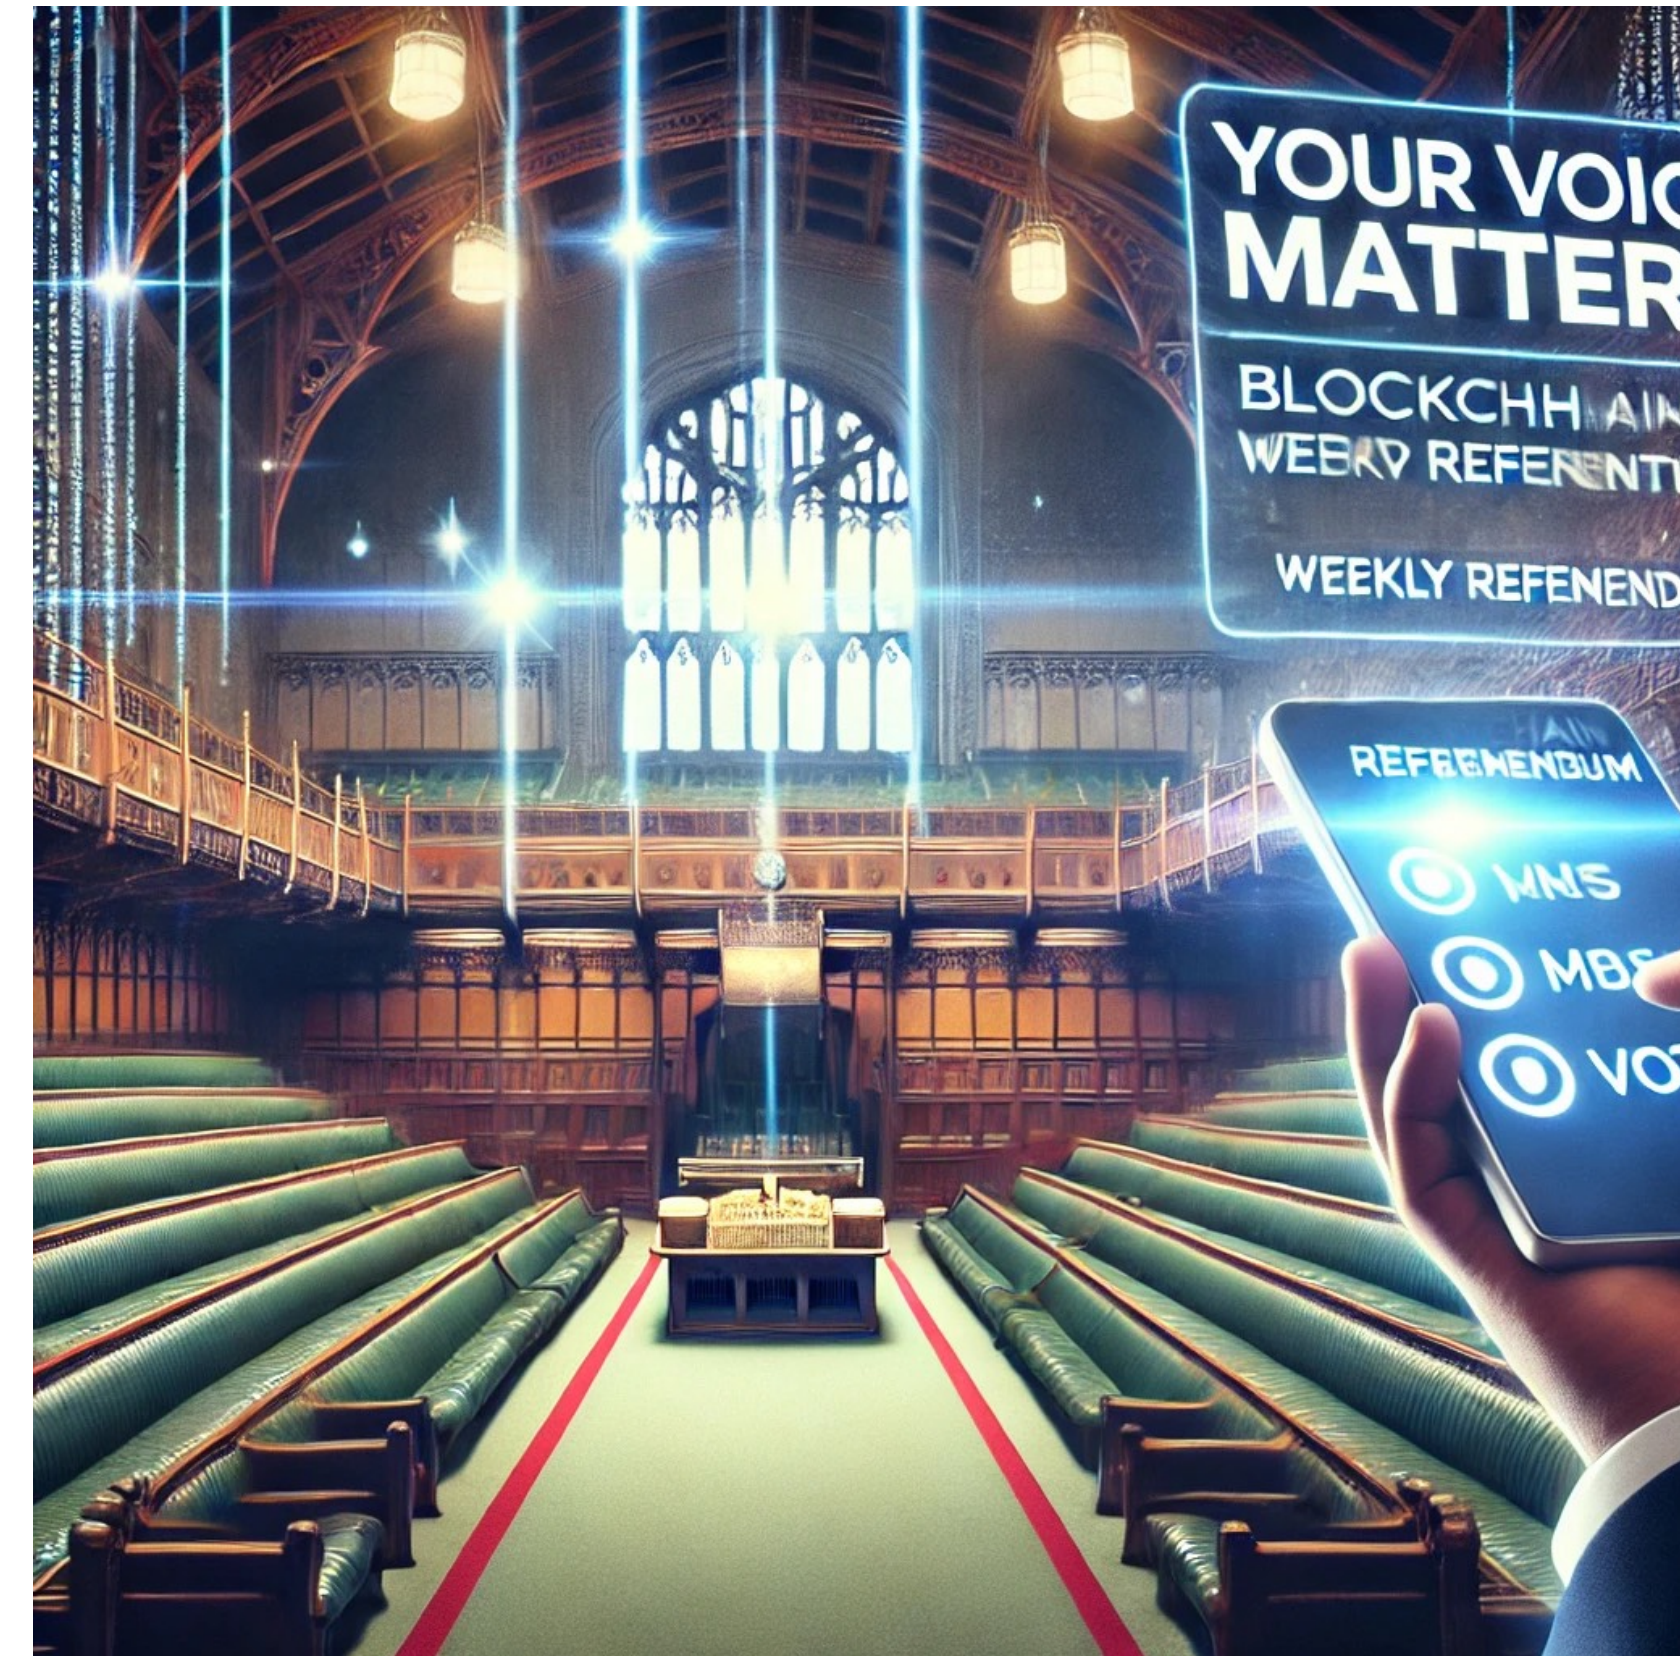

Accountability in Government

Did you know that **over 30% of MPs fail to meet basic attendance standards?** These are the people meant to lead us, to fight for us. They're not even showing up.

It's simple:

- You don't show up, you're out.
- MPs will work for the people, not their paycheques.
- Weekly referendums, powered by blockchain, will give every Briton a voice on the issues that matter most.

We're not just taking back our borders. We're taking back our democracy.

Zero Tolerance on Crime

If you're a **non-citizen** and you commit a crime here—no matter how small—you're gone. **Instant deportation. Zero appeals.**

For those born here? We'll put **25,000 plainclothes officers in London alone.** Violent offenders will face the full force of the law, and police officers will meet strict physical standards.

Britain will once again be a safe place to walk, to live, to thrive.

A Transparent and Fair Tax System

The current tax code is a labyrinth—punishing success and driving talent away. That ends now.

- **A new, simplified tax code** that can be understood in under 20 minutes.
- No hidden pitfalls or penalties for getting richer—success will be rewarded, not penalised.

This will stop the exodus of Britain's brightest and ensure that prosperity stays within our borders.

A brand new tax code for cryptocurrency working with industry leaders to encourage investment in this innovative and world changing technology.

The UK will not be left behind.

Restoring Masculinity and Strength: The Foundation of a Thriving Nation

Weak men build weak nations. Britain's decline is rooted in a culture that has forgotten the value of strength, discipline, and resilience. To restore our nation's greatness, we must rebuild its backbone—strong men who protect, provide, and lead.

- **Boxing and Wrestling in Schools**

Discipline, courage, and perseverance aren't taught—they're forged. By bringing boxing and wrestling back into schools, we will empower young men to channel their energy, learn self-control, and develop resilience in the face of adversity. These sports don't just build physical strength; they instill mental fortitude and a sense of purpose. A generation of disciplined young men will rebuild the character of our nation and restore pride in what it means to be British.

- **Licensed, Armed Security**

A nation that can't protect its streets can't protect its future. London must no longer be a city ruled by fear, where ambition and achievement are overshadowed by crime. By making licensed, armed security accessible, we will ensure that our capital is a beacon of safety and opportunity. This policy isn't about aggression—it's about deterrence and control. A secure Britain is a Britain where families, businesses, and communities can thrive without fear.

Strength—both physical and moral—is the foundation of every great nation. Britain's revival starts with restoring the virtues of masculinity: discipline, responsibility, and courage. Strong men don't just build strong nations; they inspire them. And Britain's men will lead the way.

Britain needs warriors—not worriers.

A Stronger Future for Britain: Laying the Foundations for Independence and Prosperity

We're not stopping there. Building a stronger, independent Britain requires bold steps to secure our economic and energy future.

- **A National Bitcoin Reserve**

In an unpredictable global economy, traditional financial systems are vulnerable to manipulation and collapse. A national Bitcoin reserve will future-proof Britain's economy, giving us a decentralised, inflation-resistant asset that ensures stability and shields us from economic coercion by foreign powers. This isn't just a hedge—it's a commitment to economic sovereignty, innovation, and leadership in the digital financial revolution.

- **Nuclear Power for Energy Independence**

Britain's reliance on imported energy leaves us vulnerable to price shocks, political pressure, and resource scarcity. Nuclear power is the key to breaking free from dependency. Clean, efficient, and reliable, it guarantees a stable energy supply while slashing emissions. By investing in modern nuclear infrastructure, we secure our energy independence, shield Britons from rising costs, and lay the groundwork for a self-sufficient, thriving nation.

A Stronger Future for Britain: Laying the Foundations for Independence and Prosperity

A comprehensive national health strategy emphasising prevention

- Moving beyond treatment to preventive healthcare could significantly reduce long-term health costs and improve quality of life

Revamping the voting system

- Include digital options to ensure higher voter turnout and engagement. Secure, blockchain-verified voting to increase transparency and accessibility.

Creating a 'Ministry of Future'

- Tasked with long-term planning and innovation it will focus on identifying and preparing for future challenges like demographic shifts, and technological disruptions.

Foreign Policy for Britain

- Working closely with our largest partner government, the United States, to foster cooperation in light of their political revival.
- Any organisation (UN, WHO, etc.) which erodes national sovereignty will enjoy our withdrawal. We want to save Britain and will not have foreign organisations slowing us down.

A Call to Action

These are not just policies—they are declarations of freedom. A future where Britain stands strong, independent, and unshakable, no longer at the mercy of external forces. This is the foundation of a new era for our nation.

This is the vision. A Britain that is proud, strong, and unyielding. A Britain that defends its borders, protects its people, and celebrates its culture.

We owe this to our ancestors who fought for this land. We owe this to our children who will inherit it.

This isn't just a statement—it's a call to arms. Stand with us. Fight with us. Because Britain is worth it.
